

\$SOT — Savior of the Trenches

The Token for the People, by the People.

1. Introduction

The crypto space has seen countless meme tokens rise and crash overnight. Most end up as rug pulls or pump-and-dump schemes that leave investors in losses. \$SOT (Savior of the Trenches) was created to change that narrative. We aim to revive trust, reward loyalty, and educate communities in the trenches — the heart of retail crypto.

2. Vision

To build the most transparent and community-driven meme token that actually benefits its holders and uplifts everyday traders in the trenches.

3. Mission

Our mission is simple:

- Educate crypto users to spot and avoid rugs.
- Create a sustainable meme economy that gives back to the community.
- Make every holder a stakeholder through community rewards and revenue sharing.

4. Tokenomics (Community Edition)

\$SOT is built on transparency and fairness. There are no hidden team allocations or private presales. Every token and expense is designed to benefit the trenches — the holders and contributors.

Allocation Breakdown:

- Community & Rewards — 45%
- Liquidity Pool — 35%
- Development & Operations — 10%
- Marketing & Partnerships — 10%
- Team Allocation — 0% (No pre-allocated tokens)

All gas fees and platform-generated revenues are recycled into the **Community Treasury** and used to fund:

- Weekly giveaways
- Buybacks and burns
- Contributor payments (in USDC or \$SOT)
- Marketing initiatives.

5. Governance Model

- **Community Treasury:** Managed transparently with multi-signature wallets.
- **Voting System:** All major decisions — funding, marketing, and collaborations — are proposed and voted on by holders.
- **Transparency Dashboard:** All wallets for operations, liquidity, and marketing will be publicly visible.

6. Utility

\$SOT isn't just another meme coin — it's a movement:

- Trench Education Hub: Teach newcomers how to avoid scams and rugs.
- Community Treasury: Managed by community votes.
- Holder Rewards: Passive incentives for loyal holders.
- Future Expansion: NFT collections, merch, and staking.

7. Roadmap (Condensed)

Phase 1: Community creation, website, whitepaper, and marketing.

Phase 2: Token deployment, early marketing, and influencer outreach.

Phase 3: Public sale and official \$SOT launch.

Phase 4: Anti-rug education, partnerships, and liquidity expansion.

Phase 5: Listings, community treasury growth, and global expansion.

8. Core Principles

- Transparency: No hidden wallets or secret presales.
- Fairness: Everyone gets equal access.
- Education: Helping the trenches understand risk and reward.
- Empowerment: Every contribution is rewarded.

9. Community First

\$SOT is more than a token — it's a social movement. We believe the future of crypto depends on rebuilding trust and sharing success with the people who truly make it happen — the community.

When the trenches rise, everyone eats. ■■

10. Disclaimer

\$SOT is a community project, not a financial institution. Participation is voluntary, and all holders are encouraged to DYOR (Do Your Own Research). We promote transparency, integrity, and sustainability within the meme ecosystem.
